Applicant's arguments filed on 11 December 2003 have been fully considered.

Examiner's Amendment

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Claim 1 is amended due to a typographical error. As stated in the Specification and the original submitted claims, there should be a forward slash between “)” and n_{eff} .

Claim 1 is amended as follows:

1. Fibre grating filter optical waveguide device, comprising an optical fibre consisting essentially of silica, whereby said optical fibre has an area with a diffracting grating region, wherein said area with a diffracting grating region is in direct contact with a material having a negative thermal expansion coefficient α satisfying the following equation:

$$\alpha = -(\text{dn}_{\text{eff}}/\text{dT})/\text{n}_{\text{eff}}$$

wherein $\text{dn}_{\text{eff}}/\text{dT}$ is the thermo-optic coefficient of the fibre material and dn_{eff} is the effective refractive index.

Claims 8 and 11 have been amended as follows, as per telephone interview with Mr. Peter Su:

8. Method for manufacturing a device, comprising the following steps: forming a diffraction grating area along an optical axis of an optical fibre bringing in contact of at least said area of the optical fibre with monomeric and/or oligomeric

precursor materials give a layer or a coating of said monomeric and/or oligomeric precursor materials, wherein said diffraction grating area is in direct contact with said monomeric and/or oligomeric precursor materials having a negative thermal expansion coefficient, α , satisfying the following equation:

$$\alpha = -(dn_{\text{eff}}/dT)/n_{\text{eff}}$$

wherein dn_{eff}/dT is the thermo-optic coefficient of the fibre material and dn_{eff} is the effective refractive index.

11. (Cancelled)

Authorization for this examiner's amendment was given in a telephone interview with Mr. Peter Su on 30 January 2004.

Examiner's Statement Of Reasons For Allowance

The following is an examiner's statement of reasons for allowance: The prior art of record in this application fails to disclose a fiber grating filter optical waveguide device with an optical fiber consisting essentially of silica, a diffraction grating region where the diffraction grating region is in direct contact with a material having a negative thermal expansion coefficient, α , satisfying the following equation, $\alpha = -(dn_{\text{eff}}/dT)/n_{\text{eff}}$. Furthermore, as disclosed in the Specification in paragraph 39, the temperature coefficient ranges from -7 to $-9 \times 10^{-6}/\text{K}$ with a thermo-optic coefficient ranging from 10 to $11 \times 10^{-6}/\text{k}$ and an effective refractive index between 1.45 and 1.47 . The closest prior art of record is over U.S. Patent 6,067,392 to Wakami et al. Wakami et al. discloses a diffraction fiber grating region on an optical fiber. Further, Wakami et al. discloses a diffracting grating region to be in contact with a polymer material with a negative thermal expansion coefficient and the fiber to consist of silica. Wakami et al. additionally

Art Unit: 2874

discloses a range for the negative thermal expansion coefficient to be between $-1.8 \times 10^{-5}/^{\circ}\text{C}$ and $-7.2 \times 10^{-6}/^{\circ}\text{C}$. However, it fails to fall in the range disclosed by Applicant. (Note the different units) Furthermore, Wakami et al. fails to mention or disclose a thermooptic coefficient and an effective refractive index range. Therefore, Claims 1-10 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tina M Lin whose telephone number is (571) 272-2352. The examiner can normally be reached on Monday-Friday 8:30-5:30.
